

conclusions

- $ODE \Leftrightarrow PDE \Leftrightarrow$ large SDE system

• Via resp. Lyapunov-Schmidt and mean-field limit

• Super-and-subcritical bifurcations

• Singular interactions and hypocoercivity?

• Global stability?

- Metastability for finite N ?

Conclusions

- ODE $\iff$ PDE $\iff$ large SDE system
- Via resp. Lyapunov-Schmidt and mean-field limit
- Super- and subcritical bifurcations
- Singular interactions and hypoellipticity?
- Global stability?
- Metastability for finite N ?
